DETAILED ACTION

*Response to Amendment*

1. In response to the Amendment received on October 27, 2003, the examiner has carefully considered the amendments.

*Response to Arguments*

2. Applicant's arguments, see Amendment, filed October 27, 2003, with respect to claims 1-12 and 14-25 have been fully considered and are persuasive. The rejection of claims 1-12 and 14-25 as being anticipated by Chu et al (5,516,812) under 35 USC 102(b) has been withdrawn.

*Allowable Subject Matter*

3. Claims 1-25 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is the combination of (b) a silicone resin (MQ) with the polyorganosiloxane (a), wherein the silicon resins as defined by the formulas are highly crosslinked siloxane systems. The prior art fails to teach reinforcing or combining linear photocurable polyorganosiloxanes with silicon resins (MQ) because they tend to phase separate overtime. Additionally, the prior art does not expressly teach a method of curing the above compositions to form an elastomer comprising the steps of claims 21-23. The prior art fails to teach the silicone resins as defined and used in applicant's invention which are three-dimensional structures (highly-crosslinked MQ resins) verses the linear silicone fluids in Chu et al (5,516,812). Additionally, Chu et al fails to teach using said silicone fluids to reinforce polyorganosiloxanes.
